

# Bandpass Design Showcases Handcrafted Board Game Tables for Modern Living Spaces

*July 13, 2026*

Edmonds, Washington - July 13, 2026 -
Bandpass Design, a specialty furniture workshop based in Edmonds, Washington, highlights its collection of handcrafted board game tables that serve dual purposes as both gaming surfaces and everyday furniture pieces. The company addresses the growing demand for multifunctional furniture in modern homes where dedicated game rooms are increasingly rare.

The workshop crafts each piece from solid walnut, cherry, white oak, or maple, creating furniture designed to last for generations while seamlessly integrating into contemporary living spaces. The tables transform from standard dining or coffee tables into dedicated gaming surfaces, eliminating the need for separate game room furniture.

"Modern homeowners want furniture that adapts to their lifestyle without sacrificing quality or aesthetics," said AJ Hansen, founder of Bandpass Design. "Our tables provide a dedicated space for family game nights and tabletop gaming while functioning as beautiful everyday furniture when not in use for gaming."

The Dresden Board Game Dining Table exemplifies this dual-purpose approach with its convertible design that transitions from dining table to game surface. Built-in features include cup holders, dice bins, and player stations, all integrated into the table's structure without compromising its appearance as traditional dining furniture. Customers can select from various wood types and game fabric options to match their home décor.

For living room spaces, The Firefly Board Game Coffee Table offers similar versatility with a removable top that reveals the gaming surface beneath. Storage drawers accommodate game pieces and accessories, while built-in cup holders prevent spills during gameplay. The compact Mimosa Playing Card Table fits smaller spaces such as dens or nooks, providing a comfortable setting for card games, dominoes, or board games.

The company also produces The Eolian Board Game Shelf, a storage solution designed to complement the aesthetic of their game tables while organizing board game collections. Each piece undergoes handcrafting in the Edmonds workshop, where artisans shape solid hardwoods into furniture that balances functionality with design.

"The resurgence of tabletop gaming has created a need for furniture that supports this hobby without dominating living spaces," added Hansen. "Our tables allow families to keep games accessible and encourage regular game nights without requiring architectural changes or dedicated rooms."

Beyond manufacturing, the company provides resources including buying guides, maintenance guides, game table fabric guides, and interior design tips to help customers integrate gaming furniture into their homes. The workshop offers customization options across its product line, allowing customers to specify wood types, fabric choices, and accessories to match existing furniture and personal preferences.

Bandpass Design continues to handcraft each table in its Edmonds workshop, maintaining traditional woodworking techniques while addressing contemporary furniture needs. The company ships completed tables directly to customers throughout the United States, reflecting the growing national interest in multifunctional gaming furniture for modern homes.
