

Encore Data Products Introduces AVID AE-15 USB-C Headphones for Modern Classroom Connectivity

July 17, 2026

LAFAYETTE, CO - July 17, 2026 -

Encore Data Products announced the AVID AE-15 USB-C classroom headset with microphone as part of its growing line of USB-C compatible audio solutions for the education market as schools continue to transition to newer device technologies.

The AVID AE-15 has a USB-C connection that is plug and play with current generation Chromebooks, tablets, laptops and other USB-C devices common in today's classrooms. Designed for education, the headset has an integrated microphone for interactive learning and no adapters required when connecting to USB-C devices.

"Schools across the country are updating their device fleets to USB-C devices, creating an immediate need for USB-C audio accessories," said a representative from Encore Data Products. "The AVID AE-15 has the USB-C connectivity educators need and meets the durability standards for daily classroom use."

As schools replace aging devices with newer Chromebooks, tablets, laptops and iPads with USB-C, the demand for classroom audio accessories is growing. This has created a need for reliable audio equipment that supports digital learning, online testing, virtual instruction and classroom communication without requiring adapters or converters.

Built for daily classroom use, the AVID AE-15 is durable, comfortable and simple. It has an adjustable headband that fits students of all ages, soft on-ear cushions for extended wear and a 4-foot chew-resistant cable with reinforced strain relief to withstand frequent classroom handling. The omnidirectional microphone is mounted on a 270-degree rotating boom so students can wear it on either side and get clear voice pickup during language learning, video conferencing, online testing and collaborative classroom discussions. The USB-C connection works with ChromeOS, Windows and macOS devices making deployment easy for school tech teams.

Encore Data Products offers the AVID AE-15 as an affordable classroom headset to help schools transition to USB-C on audio equipment. By combining classroom grade durability, reliable audio and voice pickup at a price comparable to many 3.5mm classroom headsets, the AE-15 makes it easier for schools to equip more students with modern learning tools. The headset is part of Encore Data Products' line of classroom audio equipment which also includes 3.5mm headphones, USB and USB-C models, wireless options and multi-unit charging systems. The move to USB-C in classrooms is part of a broader trend in education technology. As manufacturers move away from headphone jacks and towards USB-C ports, schools need accessories that fit into their evolving device ecosystems. Solutions like the AVID AE-15 help educators maintain audio quality while simplifying device compatibility for students, teachers and IT departments.

Based in Lafayette, CO, Encore Data Products provides audio and technology products for education, business, government, healthcare and institutional environments. The company offers classroom headphones, headsets, AV technology, charging solutions and technology accessories to organizations across the United States. Its product line includes classroom audio equipment, AV systems, charging carts and stations, collaboration technology and accessories for digital learning and professional workspaces. Encore Data Products serves K-12 schools to universities and also businesses, government agencies, healthcare organizations and other institutions with reliable technology solutions.
