

Pannello Home Interiors Expands Custom Closets and Cabinetry Services Across Washington DC Metro Area

July 23, 2026

WASHINGTON, DC - July 23, 2026 -

Pannello Home Interiors has announced the expansion of its custom cabinetry and interior design services throughout the Washington DC metropolitan region, addressing growing demand for personalized home solutions with accelerated project timelines. The company, operating from its Wisconsin Avenue showroom, now serves an extended radius encompassing Georgetown, Bethesda, Chevy Chase, Arlington, Alexandria, Silver Spring, McLean, and Tysons.

The expansion comes as homeowners and design professionals seek alternatives to traditional renovation timelines that typically extend eight to twelve weeks. Pannello Home Interiors delivers custom solutions within three to five weeks through its designer-led process and European engineering standards, significantly reducing project completion times for kitchen renovations, bathroom updates, and organizational system installations.

"The Washington DC real estate market demands precision and speed without compromising quality," said

Ersin Oz, Owner and Principal of Pannello Home Interiors. "Our approach transforms standard cabinetry installation into architectural furniture design, creating Custom Closets and kitchen solutions that integrate seamlessly with each home's unique character while maintaining the structural integrity essential for long-term performance."

The company specializes in comprehensive interior solutions including custom kitchen cabinets, bathroom vanities, walk-in and reach-in closet systems, architectural wall panels, designer wallpaper installations, and premium countertop fabrication. Each project incorporates professional 3D visualization technology, allowing clients to preview their spaces before construction begins.

Pannello Home Interiors distinguishes itself through in-house installation teams that eliminate subcontractor coordination challenges. This integrated approach ensures consistent quality control from initial design consultation through final installation. The company's showroom features various cabinet styles ranging from modern frameless designs to traditional inset door configurations, serving as a resource center for homeowners and design professionals exploring material options, finishes, and hardware selections.

The studio maintains extensive partnerships with interior designers, architects, and luxury builders throughout the capital region. These collaborations ensure seamless integration between custom cabinetry elements and overall design vision, particularly important for high-end residential projects where Cabinets Washington DC specifications require precise coordination with existing architectural features.

"Our clients appreciate the combination of Italian design sensibility with practical American functionality," added Oz. "Whether designing a Georgetown townhouse kitchen or creating organizational systems for a McLean estate, we focus on solutions that enhance daily living while adding lasting value to the property."

The expanded service area encompasses diverse architectural styles from historic rowhouses to contemporary condominiums, each requiring specialized approaches to maximize space utilization and aesthetic appeal. The company's portfolio includes slat wall panels, acoustic wall treatments, and carefully sourced European wallpapers that complement custom cabinetry installations.

Pannello Home Interiors offers quartz and porcelain countertop fabrication services, coordinating these elements with cabinetry projects to ensure cohesive design execution. The company's name, meaning "panel" in Italian, reflects its heritage and commitment to European craftsmanship standards while serving the Washington DC metropolitan area's sophisticated design market.
