

Majestic Pet Releases No Pull Dog Harness

May 12, 2016

May 12, 2016 - PRESSADVANTAGE -

Majestic Pet Products, a company that provides pet products based in Irvine, CA, has released a new dog harness, which is available on the Amazon marketplace. The harness is a no pull harness suitable for dogs of all sizes as it is fully adjustable. It also comes with a heavy duty leash that is surprisingly lightweight. The harness set is perfect for training and walking.

Jim Otto from Majestic Pet says: "Our goal is to make sure people can have happy, healthy pets. Having a dog means going on frequent walks, and this can be somewhat of a chore when a dog hasn't been trained well yet, or if it has a tendency to pull. Our heavy duty dog harness has been designed to make walking a treat, for both the dog and its human. We are so sure that people will love our product that we offer it with a 100% satisfaction guarantee."

The harness has been designed to fit dogs from small to large. It is comfortable and yet stops the dog from pulling. Whether people have a tiny Chihuahua or a huge Great Dane, they are able to comfortably and safely take their dogs for a walk, without restricting the dog's movement. The harness is made from a breathable, lightweight Nylon fabric and comes with a matching six foot leash.

The pet supplies store is happy to see that their harness is already proving to be popular. People are

commenting on the fact that the leash is thick and sturdy, yet flexible at the same time. One person even mentioned that they had accidentally ordered the wrong size and had therefore had to test the harness on their cat. They found that it worked even on their cat, even though cats are notoriously difficult to walk on a leash.

The harness is made from high quality materials. All stitching is box stitched, which means there won't be any stretching due to the dog pulling. It is perfect for any activity with a dog, including walking, running, or hiking. It enables people to take their dog anywhere, as it encourages the dog to walk in a straight line, by their side, without tugging or pulling.
