

New Organic Bully Sticks For Dogs Soon To Be Available

May 11, 2016

May 11, 2016 - PRESSADVANTAGE -

Bullysticks Organic, a business in North Port, FL, is proud to announce that they have developed their first range of organic bully sticks. These dog snacks, which are also good for their oral health, will be available for purchase on Amazon in the next few weeks. They will be available in a pack of six sticks, and come with a 100% satisfaction guarantee.

Victor Melo from Bullysticks Organic says: "We are committed to giving dog owners the ability to treat their animals as well as possible. We have focused specifically on bully sticks, because these are excellent treats, they are healthy, and they give dogs better oral health. Additionally, they are entertaining and can therefore be used to give a pet more confidence in being alone, for instance."

The bully sticks are 100% digestible, being made from all natural, organic, free range, grass fed beef. The sticks are completely free from chemicals and contain no additives, antibiotics, or preservatives. They have been designed to enable pet owners to give their dogs a healthy treat.

"Our sticks are healthy and high in protein," adds Victor Melo. "They are also low fat and contain essential vitamins, supporting an overall healthy diet. Your dog will love these sticks because they are so tasty, and you can rest assured that you give your dog something healthy, even naturally brushing their teeth."

The bully sticks are suitable for dogs of all sizes. Because they take some time to chew, they will keep dogs entertained, so they also remain calm and content. The sticks are very large, which means a dog will have less interest in chewing other things, such as shoes and furniture. Because they are so healthy and organic, they are even suitable for puppies and can hence be used for training as well.

The company, which has developed a number of dog antlers, dog treats, dog chews, and dog bones in the past, is fully committed to giving pet owners the best products. All their products are 100% organic and good for the overall health of the dog. They encourage people to keep their eye on their Amazon site to find out when the new sticks will be available.
