

J&D Tree Service Expands Emergency Response Capabilities Across Southwest Missouri

July 23, 2026

MONETT, MO - July 23, 2026 -

J&D Tree Service, a locally owned tree care company based in Monett, Missouri, has enhanced its emergency response capabilities to better serve property owners across five counties in Southwest Missouri during severe weather events. The expanded service addresses the region's increasing need for rapid response to storm-related tree emergencies, particularly during the active storm season that brings high winds, ice storms, and tornado activity to the area.

The enhanced emergency response system enables the company to quickly mobilize crews to handle critical situations including trees fallen on roofs, vehicles, fences, or other structures, dangerously leaning trees that pose immediate risks, large hanging branches threatening buildings, trees blocking driveways or roadways, storm-split trees at risk of further failure, and trees destabilized by flooding or soil washout. With over 20 years of experience serving Barry, Lawrence, Stone, and surrounding counties, the company has structured its operations to provide 24/7 availability for urgent tree-related hazards.

"When severe weather strikes Southwest Missouri, property owners need immediate assistance to secure their homes and businesses," said John Marmon of J&D Tree Service. "Our enhanced emergency response protocols allow us to deploy crews more efficiently across our service area, reducing wait times for homeowners facing dangerous tree situations. We understand that storm damage can be overwhelming, which is why we also provide comprehensive documentation, photos, and invoices to support insurance claims."

The timing of this service expansion aligns with historical weather patterns showing increased severe weather activity in Southwest Missouri during spring and early summer months. The company's emergency response covers a wide service area including Monett, Cassville, Aurora, Mount Vernon, and surrounding communities, ensuring rapid deployment when storms impact the region.

Beyond emergency services, J&D Emergency Tree Service continues to provide comprehensive tree care including removal of hazardous, dead, or unwanted trees, professional pruning and trimming to improve tree structure and longevity, and stump grinding services to eliminate tripping hazards and prepare yards for new landscaping. The company maintains full insurance coverage and has completed over 500 jobs while maintaining a claims-free record.

The enhanced emergency response system builds upon the company's existing infrastructure and experienced crew base. Property owners facing storm-related tree emergencies receive not only immediate response but also professional assessment of potential hazards that may not be immediately visible. The company provides free estimates for all services, allowing property owners to make informed decisions about necessary tree work following storm events.

J&D Tree Service is a fully insured, locally owned and operated tree care company serving Southwest Missouri. With over two decades of experience in the tree service industry, the company specializes in emergency response, tree removal, trimming, and stump grinding services for residential and commercial properties throughout Barry, Lawrence, Stone, and surrounding counties.
