

J&D Tree Service Expands Insured Tree Removal Services Across Southwest Missouri

August 14, 2026

MONETT, MO - August 14, 2026 -

J&D Tree Service, a locally owned and operated company based in Monett, Missouri, has announced the availability of its professional tree removal services for homeowners, farms, and commercial properties throughout Southwest Missouri. The expanded offering gives property owners across Barry, Lawrence, Stone, and surrounding counties access to a fully insured tree removal contractor with more than 20 years of experience in the industry.

The announcement addresses a longstanding need in the region, where aging trees, seasonal storms, and unpredictable weather patterns often leave dead, diseased, and hazardous trees on residential and commercial land. J&D Tree Service Tree Removal now covers trees of any size, including storm-damaged, structurally compromised, and simply unwanted trees, using proper equipment and rigging techniques suited for tight spaces near structures, fences, and utility lines.

The company has structured its removal process to prioritize safety and thoroughness. Each project begins

with a free on-site assessment, followed by a safety plan tailored to the property. Crews then remove trees through sectioning or whole removal, depending on the location and surrounding conditions. The service includes full debris hauling and optional stump grinding to complete the job and leave yards clear of tripping hazards. When applicable, the company also advises property owners on local permit requirements.

John Marmon, owner of J&D Tree Service, said the expanded services reflect the demand seen across the region for reliable and safe tree work. "Property owners in Southwest Missouri need a contractor who can handle difficult removals without putting homes, fences, or power lines at risk," Marmon said. "Over the past 20 years, the crews have refined the equipment and rigging methods needed to take down trees in confined spaces, and that experience makes a measurable difference on every job."

The company has completed more than 500 jobs while maintaining a claims-free record, a milestone Marmon attributes to careful planning and proper technique. "Every tree presents a different challenge, so the process starts with a free assessment and a clear safety plan before any cutting begins," he said. "That approach protects the property and gives owners a full understanding of the work before it starts."

J&D Tree Service serves both residential and commercial clients, offering free estimates for tree removal, tree trimming, and stump grinding. The company remains available for scheduled maintenance as well as urgent situations involving downed trees, hazardous branches, and storm damage across communities including Monett, Cassville, Aurora, and Mount Vernon.

J&D Tree Service is a locally owned and operated, fully insured tree care company based in Monett, Missouri. With over 20 years in the industry and more than 500 completed jobs, the company provides tree removal, tree trimming, stump grinding, and emergency services to homeowners and property managers across Barry, Lawrence, Stone, and surrounding counties in Southwest Missouri. The company is licensed and insured and offers free estimates for its services.
