Blackhawk Plastic Surgery & MedSpa Highlights AAAASF and Medicare Accreditation Held by Few Bay Area Plastic Surgeon Practices

August 13, 2026

Danville, CA - August 13, 2026 -

Blackhawk Plastic Surgery & MedSpa, a plastic surgery practice and medical spa in Danville, California, is drawing attention to the dual accreditation of its on-site Blackhawk Surgery Center, which holds certification from both the American Association for Accreditation of Ambulatory Surgery Facilities (AAAASF) and Medicare, a distinction that few practices in the Bay Area currently hold.

An on-site, accredited surgery center allows a practice to perform procedures within a facility that has been independently reviewed against established standards for equipment, staffing, emergency preparedness, and patient monitoring. AAAASF accreditation requires facilities to meet specific criteria and undergo periodic inspections, while Medicare certification reflects compliance with federal facility standards. The combination of both is uncommon among privately operated plastic surgery centers in the region.

The surgery center operates as part of the practice led by Dr. Stephen J. Ronan, MD, FACS, who is board certified by the American Board of Plastic Surgery. The facility supports the practice's surgical care across face, breast, and body procedures, and is complemented by a full medical spa offering injectables, laser

treatments, and medical-grade skin care, along with hyperbaric oxygen therapy used to support recovery.

"Accreditation is not a one-time formality; it is an ongoing commitment to standards that are reviewed and verified by outside organizations," said Dr. Stephen J. Ronan, board-certified plastic surgeon at Blackhawk Plastic Surgery & MedSpa. "When a surgery center is accredited by both AAAASF and Medicare, it signals that the environment where care is delivered has been held to a consistent, measurable benchmark. For anyone researching a procedure, understanding where surgery takes place is as important as understanding who performs it."

Health education advocates often encourage prospective patients to ask where a procedure will be performed and whether the facility is accredited. An accredited on-site center means surgical care can be provided in a controlled setting connected to the practice, rather than relying on a separate hospital or unaccredited location. The standards addressed by accrediting bodies typically cover surgical safety protocols, sterilization practices, anesthesia administration, and staff qualifications.

"Patients frequently focus on the outcome they hope to achieve, and rightly so, but the systems supporting that care matter a great deal," Dr. Ronan added. "Transparency about accreditation gives people a factual foundation for their decisions."

Blackhawk Plastic Surgery, based at 3600 Blackhawk Plaza Circle in Danville, California, and reachable through blackhawkplasticsurgery.com, offers virtual consultations and a program for out-of-town patients seeking care.

Blackhawk Plastic Surgery and MedSpa is a medical practice specializing in cosmetic and reconstructive procedures, including face, breast, and body surgery, hair restoration, and a range of medical spa services such as laser treatments, injectables, and skin health care. The practice is led by Dr. Stephen J. Ronan, MD, FACS, a board-certified plastic surgeon, and operates the on-site Blackhawk Surgery Center accredited by AAAASF and Medicare. The practice serves patients in Danville, California, and the surrounding Bay Area.
