Truly Investor Cap Expands Digital Resources with New Linktree Platform for Real Estate Investors

July 16, 2026

July 16, 2026 -
Truly Investor Cap has launched an official Linktree platform, creating a centralized digital hub that streamlines access to the company's comprehensive real estate lending resources and financing solutions for investors, mortgage brokers, and business partners nationwide.

The new platform consolidates multiple touchpoints into a single destination, enabling real estate professionals to efficiently navigate between loan programs, social media channels, educational content, and company updates. The Truly Investor Cap Linktree serves as a comprehensive directory for the company's expanding portfolio of real estate financing options, including DSCR loans, bridge loans, construction loans, and rehabilitation financing.

"The launch of our Linktree platform represents our commitment to making real estate financing more accessible and transparent for investors across the country," said a spokesperson for Truly Investor Cap. "This centralized resource hub eliminates the need to search across multiple platforms for information about

our loan products and company updates. Real estate investors can now access everything from DSCR loan details to construction financing options through one streamlined portal."

The platform's introduction comes as Truly Investor Capital continues to expand its presence in the real estate lending market, having funded over 116 loans across multiple states. The company specializes in providing fast, streamlined lending solutions tailored to various investment strategies, with loan products designed to meet the diverse needs of real estate investors and developers.

Through the new Linktree platform, visitors can explore detailed information about the company's four primary loan products. Rehabilitation loans offer up to 90 percent of purchase price and 100 percent of renovation costs with interest-only payment options. Construction loans provide flexible draw schedules with terms ranging from 12 to 24 months for ground-up projects. DSCR loans, based on rental income rather than personal income, offer up to 80 percent loan-to-value ratios with 30-year fixed options. Bridge loans deliver short-term financing solutions with 12-month terms and no prepayment penalties.

The platform also serves as a gateway to the latest Truly Investor Capital Article releases and company announcements, ensuring that partners and clients stay informed about market developments, lending program updates, and educational resources. The integration of social media channels through the Linktree enables real-time engagement with the company's growing community of real estate investors and industry professionals.

Real estate professionals utilizing the platform can access resources for both direct borrowers and broker partners, reflecting the company's dual approach to serving the investment property market. The streamlined navigation structure supports the company's three-step funding process, which includes deal structuring, application submission, and expedited processing.

Truly Investor Capital specializes in providing flexible financing solutions for real estate investors, with a focus on speed and efficiency in loan processing. The company offers a comprehensive suite of loan products designed to support various investment strategies, from fix-and-flip projects to long-term rental property acquisitions. With operations spanning multiple states and a proven track record of successful loan closings, the company has established itself as a trusted partner for real estate investors seeking reliable financing solutions.
