Bay Shores Cleaning Company Celebrates Grand Opening and Ribbon Cutting in Midland

July 15, 2026

Midland, Michigan - July 15, 2026 -
Bay Shores Cleaning Company held a grand opening and ribbon cutting ceremony in Midland. The event introduced the business to the local community as it begins operations from its location at 144 Ashman Street.

The company, founded by Midland native Wendy Nellet, extends services previously offered through an affiliated operation in northern Michigan. It provides residential cleaning services, residential deep cleaning services, and commercial cleaning services to Midland, Sanford, Freeland, Auburn and nearby areas. Team members handle regular maintenance and thorough cleaning tasks for homes and business spaces.

The ribbon cutting marked the start of the company's presence in the area. Bay Shores Cleaning Company focuses on delivering timely work with exceptional attention to detail, ensuring customer satisfaction. The business offers a variety of options for eco-friendly products and maintains required licensing and insurance for added peace of mind.

Wendy Nellet commented on the grand opening, stating, ?This ribbon cutting represents more than just the

opening of a business, it's the beginning of long-term relationships with the people and organizations we?re honored to serve. Our goal is to create clean, welcoming environments while making a positive impact in our community.?

The Midland Business Alliance participated in the ribbon cutting event and welcomed the new business to the local economy. This recognition highlights the addition of another service provider in the community.

?We?re proud to bring our values of reliability, care, and professionalism to Midland and look forward to growing alongside the people we serve,? continued Nellet.

Bay Shores Cleaning Company operates according to defined values that include communication, optimism, safety, accountability, grace, making a difference, and family. The business supports team development through classes on workplace appreciation, financial education, and other topics. It also partners with initiatives such as Cleaning for a Reason to offer services to patients and older adults.

The company draws on experience from its sister operation established in 2013. This background informs approaches to residential and commercial work in the Midland region. Services address weekly or bi-weekly needs as well as more intensive cleaning projects. Clients in the served communities gain access to these options through the new location.

Bay Shores Cleaning Company aims to build connections with local residents and organizations. The grand opening provided an opportunity for community members to learn about available cleaning support for homes and workplaces. Clean spaces contribute to daily routines in both residential and professional settings.

Operations emphasize consistent performance across service areas. The business plans to expand its team to meet demand while continuing to invest in employee growth and community activities. This approach supports integration into the regional economy over time.

The event at 144 Ashman Street aligned with the company's focus on local roots and service. Wendy Nellet returned to her hometown to establish the operation after building experience elsewhere. The expansion brings additional capacity for cleaning services in the area. Bay Shores Cleaning Company maintains a structure that prioritizes client requirements in scheduling and execution. The ribbon cutting served as a formal introduction, allowing area representatives to note the new presence.

Future activities will center on fulfilling cleaning needs across the specified locations. In addition to residential services, the company aims to explore partnerships with local businesses to enhance community engagement and address diverse cleaning needs across the region. This approach seeks to strengthen ties and foster a collaborative environment.
