

Blazek Construction, LLC Announces Expansion of Bedroom and Living Space Remodeling Services Throughout Southeast Tennessee Communities

July 17, 2026

HIXSON, TN - July 17, 2026 -

Blazek Construction, LLC has announced the expansion of its bedroom and living space remodeling services to additional communities throughout Southeast Tennessee, making the service available to homeowners in Chattanooga, Hixson, Soddy-Daisy, Red Bank, Middle Valley, Lakesite, Signal Mountain, Dunlap, and Dayton. The expanded service area reflects the company's continued growth in residential remodeling and provides broader regional access to its design-build remodeling process. Blazek Construction, LLC has served homeowners from its Hixson headquarters since 2006 through custom home construction and residential renovation services. The company continues to coordinate remodeling projects using a single process that integrates design, planning, budgeting, permitting, construction, and project management.

The expansion comes as homeowners continue investing in existing properties rather than relocating. According to the 2025 U.S. Houzz & Home Study, interior living spaces remain among the most frequently renovated areas as homeowners adapt houses to accommodate evolving lifestyles, flexible work arrangements, and changing family needs. The continued demand for practical interior improvements has contributed to sustained activity across the residential remodeling sector.

The announcement highlights Blazek Construction, LLC's continued focus on enhancing its bedroom and living space remodeling service for homeowners across its regional service area. The company remains committed to delivering coordinated design-build remodeling projects that help homeowners update existing living spaces to better support changing household needs.

Bedroom and living space remodeling has become an increasingly common choice for homeowners seeking to improve how existing homes function without increasing the home's footprint. Many projects focus on creating more efficient layouts, improving storage, updating finishes, enhancing lighting, or adapting rooms for changing household needs. Depending on project goals, renovations may include room reconfiguration, custom millwork, built-in storage, flooring replacement, upgraded trim, lighting improvements, and finish selections designed to improve comfort and everyday usability.

Each remodeling project follows Blazek Construction, LLC's established design-build process. Planning begins with an on-site consultation to evaluate the existing space, discuss homeowner objectives, and develop preliminary design concepts. The project team coordinates budgeting, material selection, permitting when required, scheduling, and construction management before work begins. Throughout construction, homeowners receive project updates while skilled trades complete each phase according to the established schedule.

Because bedroom and living areas serve different purposes from household to household, remodeling plans are developed around the way each space is used. Bedrooms may be redesigned with improved closet systems, built-in storage, upgraded flooring, or revised layouts that improve organization and accessibility. Living spaces frequently incorporate updated lighting, integrated shelving, entertainment features, architectural trim, or improved room flow that better supports family gatherings, entertaining, or remote work.

The coordinated design-build model allows planning decisions to remain aligned throughout construction. Rather than relying on separate consultants and contractors, the company manages design coordination, budgeting, scheduling, construction oversight, and project completion through one team. This approach helps maintain continuity from initial planning through the final walkthrough while documenting project changes and construction milestones throughout the process. The company also emphasizes written approvals for change orders, project oversight during key construction phases, and completion documentation that includes warranty information and care instructions.

Nick Blazek, owner of Blazek Construction, LLC, said the expansion reflects how residential remodeling priorities continue to evolve throughout the region.

"Many homeowners appreciate where they live but need their interiors to function differently than they did several years ago," said Nick Blazek. "Expanding this service allows more families throughout the region to reconfigure existing spaces in a practical way while working with one team from planning through project completion."

The expansion also allows homeowners planning multiple renovations to coordinate projects through one construction company. Bedroom and living space remodeling can be completed independently or alongside kitchen remodeling, bathroom remodeling, basement finishing, home additions, garage additions, whole-home renovations, and custom home construction. Managing related projects through one design-build process helps coordinate scheduling, design consistency, and construction sequencing across larger residential improvements.

As demand for residential remodeling continues across Tennessee, many homeowners are choosing to improve existing homes to better accommodate long-term lifestyle changes rather than pursue new housing. Interior remodeling provides opportunities to modernize living environments while preserving established neighborhoods and existing property investments. The company expects the expanded availability of its bedroom and living space remodeling service to support homeowners seeking functional interior improvements throughout its growing regional service area.

As the expanded service becomes available across additional Southeast Tennessee communities, Blazek Construction, LLC expects the broader coverage to improve access to professionally managed interior remodeling projects for homeowners seeking practical updates to existing living spaces. The expansion reflects the company's continued focus on serving regional homeowners through a structured design-build process while maintaining the personalized project oversight that has guided its residential construction work since 2006.

Blazek Construction, LLC is a residential construction company based in Hixson, Tennessee, specializing in custom home building and remodeling services. The company provides design-build construction solutions for homeowners throughout Chattanooga, Hixson, Soddy-Daisy, Red Bank, Middle Valley, Lakesite, Signal Mountain, Dunlap, Dayton, and surrounding communities. Its services include custom homes, whole-home renovations, kitchen and bathroom remodeling, bedroom and living space remodeling, basement finishing, home additions, garage additions, interior upgrades, and outdoor living projects.
