

Jeff England Motor Company Provides 24-Hour Towing and Recovery Services

July 17, 2026

CLEBURNE, TX - July 17, 2026 -

Jeff England Motor Company offers 24-hour towing and recovery services to assist drivers throughout North Texas who experience vehicle accidents or mechanical breakdowns. The dealership, which has operated in the area for more than 20 years, integrates this towing capability with its pre-owned vehicle sales and service department to support a range of customer needs involving cars, trucks, vans, SUVs, and commercial vehicles.

The towing operation functions continuously, enabling rapid response to calls at any hour. A state-of-the-art flat-bed truck forms the core of the equipment, allowing the team to manage transport for passenger vehicles as well as light to medium-duty trucks. In cases of accidents, vehicles can be taken to partnering local body shops even after regular business hours. For mechanical issues, the service directs vehicles to the dealership's repair facility, where further diagnostics and work can begin promptly. This setup helps address immediate roadside situations while connecting to longer-term maintenance solutions.

Jeff England Motor Company's service department handles an extensive list of repairs and maintenance procedures. Technicians perform tune-ups, replace hoses, belts, filters, and batteries, conduct emissions

system repairs to meet state inspection requirements, complete wheel alignments, service air conditioning systems, address brake needs, maintain fuel systems, repair engines and transmissions, and work on suspension components including struts and shocks.

Quick-lube services support routine oil changes and fluid checks. The department extends its capabilities to passenger cars, pickups, farm and construction equipment, and medium-duty commercial trucks, utilizing modern diagnostic tools and a stocked parts department to facilitate timely completion of tasks.

"Vehicle breakdowns and accidents can occur at any time, and our towing team stands ready to provide professional response whenever needed," said Jeff England, Owner. "The integration of towing services with our repair operations allows us to support customers from the initial response through resolution of the underlying issue."

England continued, "Our service technicians focus on quality work using appropriate parts and techniques while taking customer schedules into account, which has contributed to the dealership's repeat business over the years."

The dealership maintains an inventory of pre-owned commercial trucks suited for business applications, including models with flatbed configurations and other work-oriented features from manufacturers such as Chevrolet, Ford, GMC, Freightliner, and Kenworth. These offerings range from lighter duty units to more robust options for hauling and operational tasks. The commercial vehicle selection aligns with the service and towing resources, providing a single point for acquisition, customization through the truck accessory showroom, and ongoing maintenance.

Customer accounts have noted the dealership's handling of service-related matters. Feedback from recent interactions points to staff members extending availability to complete transactions and address details thoroughly. Such reports align with the dealership's emphasis on practical support for vehicle owners in the region.

In addition to towing and core repairs, Jeff England Motor Company operates a truck accessory showroom that supplies items for protection, utility, performance, and style enhancements. As a franchised Line-X spray-on bed liner dealer, it offers specialized applications for work trucks. These resources support customers who utilize vehicles for commercial purposes in North Texas industries.

The dealership sources its pre-owned inventory with attention to current market availability, resulting in regular turnover of vehicles across categories. This dynamic selection includes options for both personal and business use. The towing service plays a role in the overall operation by facilitating transport of vehicles that may require pre-sale preparation or post-purchase attention.

Regional reliance on trucks for construction, agriculture, delivery, and other activities makes responsive service infrastructure relevant. Jeff England Motor Company's combination of sales, 24-hour towing, and comprehensive repairs addresses multiple aspects of vehicle operation in this context. The flat-bed towing equipment accommodates diverse vehicle types, contributing to efficient handling during recovery situations.

Service processes at the dealership prioritize clear communication regarding repairs and timelines. Parts availability helps reduce delays, while the technician team covers a broad spectrum of vehicle makes and models. Towing responses include assessment at the scene and appropriate routing, whether to repair facilities or body shops.

Jeff England Motor Company has maintained its position in the North Texas market through consistent attention to these operational areas. The 24-hour towing component extends the dealership's reach beyond standard business hours, supporting drivers and businesses that operate on varied schedules. As vehicle technologies advance and regional demands shift, the company continues to adapt its service framework accordingly.

This integrated model of vehicle sales, towing, and repair enables Jeff England Motor Company to function as a resource for a wide range of needs in the pre-owned and commercial vehicle sectors. The dealership's history in the area informs its approach to providing factual assistance based on established practices.
