

ProSteam Carpet Care and Restoration Expands Services Across St. Louis Area

July 21, 2026

July 21, 2026 -

ProSteam Carpet Care and Restoration has expanded its comprehensive restoration services throughout the greater St. Louis area, addressing growing demand for professional carpet cleaning and property restoration solutions in both residential and commercial sectors.

The expansion enables the company to serve a broader range of clients across St. Louis and surrounding communities, offering specialized carpet cleaning, water damage restoration, and emergency response services. This strategic growth comes as property owners increasingly seek professional restoration services to maintain and protect their investments.

"The expansion of our service area reflects our commitment to meeting the growing needs of St. Louis property owners," said Gina Krohn, speaking for ProSteam Carpet Care and Restoration. "We have invested in additional equipment and trained technicians to ensure we can deliver the same high-quality restoration services to a wider geographic area while maintaining our rapid response times."

The company specializes in comprehensive carpet cleaning using advanced steam extraction methods, water

damage mitigation, mold remediation, and emergency restoration services. Their expanded coverage area now includes residential neighborhoods, commercial districts, and industrial properties throughout the St. Louis metropolitan region.

Recent industry data indicates that professional carpet cleaning and restoration services have become increasingly essential for property maintenance, with regular professional cleaning extending carpet life by up to 50 percent. The expansion positions the company to meet this demand while maintaining its established service standards.

The increased service capacity allows the company to deploy multiple restoration teams simultaneously, reducing wait times for both scheduled maintenance and emergency response situations. The expansion includes the addition of specialized equipment for large-scale commercial projects and advanced moisture detection technology for water damage assessment.

"Reviews from our existing clients have consistently highlighted the importance of having reliable, professional restoration services available locally," added Krohn. "This expansion allows us to bring our expertise to more communities that need dependable carpet care and restoration solutions, particularly during emergency situations where rapid response is critical."

The expanded service area includes enhanced emergency response capabilities, with technicians strategically positioned throughout the region to minimize response times for water damage and other urgent restoration needs. The company maintains certification in industry-standard restoration techniques and utilizes commercial-grade equipment for all services.

ProSteam Carpet Care and Restoration provides residential and commercial carpet cleaning, water damage restoration, mold remediation, and emergency restoration services throughout the St. Louis area. The company combines advanced cleaning technology with certified restoration techniques to serve property owners facing routine maintenance needs or unexpected damage situations. Their services include deep carpet cleaning, upholstery cleaning, tile and grout restoration, water extraction, structural drying, and comprehensive property restoration following water, fire, or storm damage. The company employs Institute of Inspection Cleaning and Restoration Certification (IICRC) trained technicians and maintains a fleet of truck-mounted cleaning systems for optimal service delivery.
