

Inland Cosmetic Surgery Announces Patient Education Event for Facelift Surgery

August 10, 2026

RANCHO CUCAMONGA, CA - August 10, 2026 -

Inland Cosmetic Surgery will host a patient education program on Thursday, August 27, from 5:00 to 7:00 PM at the Sanctity Hotel in Rancho Cucamonga, California. The event will feature actual facelift patients sharing their experiences directly with prospective patients through an unscripted question-and-answer session, addressing the growing need for transparent, firsthand information about facial cosmetic surgery procedures.

The program represents a departure from traditional surgeon-led presentations, instead prioritizing direct patient-to-patient dialogue about recovery experiences, results, and the decision-making process surrounding facelift surgery. This format addresses an information gap in aesthetic surgery, where prospective patients often struggle to distinguish between marketing claims and realistic expectations regarding recovery timelines, scarring, and surgical outcomes.

Dr. Jacob Haiavy, a cosmetic surgeon with more than 25 years of experience and over 10,000 cosmetic procedures performed, developed the program in response to the proliferation of online marketing for facial rejuvenation procedures by physicians without the proper training to offer excellent results safely. As a published researcher in peer-reviewed journals on facial rejuvenation and breast surgery techniques, Dr.

Haiavy recognizes the importance of evidence-based patient education.

The interactive format allows attendees to ask specific questions about post-operative experiences, pain management, activity restrictions, and the emotional aspects of recovery, gaining a patient perspective on these elements of aesthetic surgery that is absent from traditional surgical consultations. Previous patients will discuss their initial concerns, decision-making criteria, and satisfaction with their results, providing prospective patients with practical insights.

The timing of this educational initiative reflects broader trends in cosmetic surgery toward increased transparency and patient empowerment. As aesthetic procedures become more mainstream and visible through social media platforms, patients increasingly seek comprehensive information and perspectives, particularly for life-altering surgical procedures like facelifts that require substantial recovery periods and financial investment.

"Patients considering facelift surgery deserve access to authentic, unfiltered information from those who have actually undergone the procedure," stated Dr. Haiavy. "While clinical expertise remains essential, hearing directly from patients who have navigated the recovery process provides a perspective that medical professionals simply cannot replicate. This event creates a space for honest dialogue about both the challenges and rewards of facial rejuvenation surgery."

Space for the August 27 event is limited, and interested individuals should contact Inland Cosmetic Surgery directly to reserve attendance. Additional information and registration details are available through the practice's website.

Inland Cosmetic Surgery, located in Rancho Cucamonga, California, has established itself as a leading cosmetic surgery practice in Southern California. Alongside Dr. Emma Ryan, Dr. Haiavy specializes in facial rejuvenation, breast augmentation, body contouring procedures, and comprehensive mommy makeovers. Dr. Haiavy, a former president of both the American Board of Cosmetic Surgery and the California Academy of Cosmetic Surgery, has authored numerous scientific articles and textbook chapters on facial cosmetic surgery. He also directs an AACS-accredited cosmetic surgery fellowship program, training two surgeons annually in advanced cosmetic surgery techniques.
