

Brand New RV Resort & Campground Marketing Bundle Includes Text Message Package

May 13, 2016

May 13, 2016 -

Chedall LLC, a business in Wilmington, Delaware, is partnering with RezExpert to release a new messaging package, known as SendOut Expert, which is part of a brand new RV resort and campground marketing bundle. SendOut Expert includes SendText Expert for text messaging, Push Expert for push notifications, and MailOut Expert for email messaging. Put together, the package is designed to ensure businesses can better organize their mailings. It is directed specifically for those involved in RV resort and campground marketing.

David Hall from Chedall LLC says: "Our brand new marketing package is suitable specifically for RV resorts and campgrounds. It comes with text messaging, email messaging, and push notifications. Additionally, it comes with campground reservation software for as many as 120 RVs, camping, or tenting sites. For those who require more than 120 sites, arrangements can be made. Finally, the package includes a full page ad and enhanced listing inside the Campfire Travel e-magazine."

The bundle is fully comprehensive and provides campgrounds and RV sites with a number of specific benefits. They can send up to 3,000 text messages per month, as well as have access to an autoresponder.

Furthermore, the system is fully FTC compliant and includes highly detailed reports. It can be accessed from anywhere and is designed to be easy to use.

"The email messaging element is particularly impressive," adds David Hall. "It enables businesses to build a list of 10,000 people, and they can send unlimited emails, as well as newsletters. Plus, it can be customized, so that campsites can create multiple marketing lists, and unlimited individual campaigns. Again, the system is fully FTC compliant, and has been designed to be very easy to use."

The final element to the new system, as can be seen on http://sendoutexpert.com/, is the push notification element. This is used by Fortune 500 companies all over the world. It enables companies to send messages to Android, Mac and PCs. Marketing messages can be queued and sent by data range, and those who sign up to the system can send unlimited messages. As with the text messaging and email messaging system, it is fully FTC compliant and has been designed with ease of use in mind.
