

LawnWorks Lawn Care Expands Lawn Care Services to Naperville, Illinois

August 21, 2026

Crest Hill, IL - August 21, 2026 -

LawnWorks Lawn Care, a family-owned company based in Joliet, Illinois, has expanded its coverage area to include Naperville, bringing professional lawn treatments and turf maintenance to residents and businesses throughout the community.

The expansion adds Naperville to a service area that spans dozens of communities across the southwestern suburbs of Chicago, including Aurora, Bolingbrook, Plainfield, Downers Grove, Orland Park, and Yorkville. Naperville property owners can now access the full range of lawn care programs the company has provided to homeowners since 1988.

Among the offerings available to Naperville customers are lawn fertilization, weed control, liquid aeration, mosquito control, lawn disease control, grub control, overseeding, garden bed weed management, and lawn pest control. Each program can be tailored to the specific conditions of a property, addressing soil health, root development, and seasonal needs throughout the growing year.

"Naperville has a strong mix of established neighborhoods and newer developments, and the lawns in each may require a different approach," said Josh Cull, owner of LawnWorks Lawn Care. "We account for local soil conditions, weather patterns, and the challenges that come with maintaining turf in this part of Illinois."

The company builds its programs around a combination of controlled-release, slow-release, and organic-based fertilizers, timed to deliver nutrients when lawns need them most. Aeration and overseeding services are designed to help air, water, and nutrients reach the root zone, while disease and pest control programs address problems before they spread across a yard.

LawnWorks Lawn Care has served the southwestern suburbs for more than three decades, building a reputation for attention to detail and a personalized approach to each property. The company reports a customer rating of 4.9 based on 843 reviews, with clients citing professionalism and consistent results.

"Our goal has always been to ensure people like doing business with us. We prefer a personal touch as opposed to layers of corporate structure," Cull said. "Bringing that same standard of service to Naperville is a natural step for a company that has grown alongside these communities for years."

Mosquito control represents another area of focus, with targeted treatments intended to reduce breeding sites and make outdoor spaces more comfortable during the warmer months. The company pairs these treatments with its broader lawn care programs to offer property owners a coordinated approach to lawn care.

LawnWorks Lawn Care is a locally owned, family-run company serving communities throughout the southwestern suburbs of Chicago. Since 1988, the company has provided lawn care services including fertilization, weed control, aeration, overseeding, soil enrichment, disease and pest control, and mosquito control. Its programs are structured to keep turf and soil in strong condition across the seasons, and the company continues to expand its coverage across the region to reach additional Illinois communities.
