

PuroClean of Nanuet Launches Updated Website to Enhance Water Damage Restoration Services

July 29, 2026

NANUET, NY - July 29, 2026 -

PuroClean of Nanuet has launched a newly updated website designed to provide property owners with improved access to critical damage restoration resources and emergency services. The enhanced digital platform streamlines the process for residents and businesses seeking immediate assistance with water, fire, mold, and biohazard damage restoration.

The updated website features comprehensive information about the company's full range of restoration services, including detailed explanations of water damage mitigation processes, fire and smoke damage restoration procedures, mold remediation protocols, and biohazard cleanup standards. The new design prioritizes user experience, making it easier for property owners to understand the restoration process and access emergency services when disaster strikes.

"Property damage can be overwhelming, and having immediate access to professional restoration services is crucial," said Mitch Cohen, owner of PuroClean of Nanuet NY. "Our updated website reflects our commitment to being there for our community 24 hours a day, seven days a week. The new platform provides property owners with the information they need to make informed decisions during stressful situations."

The website enhancement comes at a time when property owners face increasing challenges from water damage caused by aging infrastructure, severe weather events, and hidden moisture issues. Recent industry data indicates that water damage affects approximately one in 50 homeowners annually, with many incidents occurring from sources that develop gradually without visible warning signs.

PuroClean of Nanuet New York specializes in addressing both sudden catastrophic damage and gradual deterioration issues. The company utilizes advanced moisture detection equipment to identify hidden water damage that can lead to structural problems and mold growth if left untreated. Their certified technicians employ state-of-the-art extraction equipment and industrial-grade dehumidifiers to thoroughly dry affected

properties and prevent secondary damage.

The restoration company's comprehensive approach extends beyond water damage to include complete fire and smoke damage restoration, professional mold remediation, and specialized biohazard cleanup services. Each service follows strict industry protocols and safety standards to ensure properties are properly restored and safe for occupancy.

"We understand that property damage doesn't follow a schedule, which is why we maintain round-the-clock availability," added Cohen. "Our updated website reinforces our position as a trusted restoration partner that property owners can rely on during their most challenging moments."

The company's mold remediation services have become increasingly important as property owners become more aware of the health risks associated with mold exposure. Their certified technicians conduct thorough assessments to identify the extent of mold damage, implement containment procedures to prevent spread, and provide preventive measures to stop future growth.

PuroClean of Nanuet operates as a full-service damage restoration company serving residential and commercial properties throughout the region. The company maintains a team of certified restoration professionals trained in the latest industry techniques and equipped with advanced restoration technology. Their services encompass emergency water extraction, structural drying, smoke odor removal, mold remediation, and biohazard cleanup, providing comprehensive solutions for property damage restoration needs.
