Crown Plumbing & Water Damage Restoration Announces Enhanced Focus on Fire and Water Damage Restoration Services

August 03, 2026

SAN ANTONIO, TX - August 03, 2026 -

Crown Plumbing & Water Damage Restoration, a licensed restoration company serving the San Antonio area since 2006, has announced a strategic shift to concentrate on comprehensive fire damage, water damage, and mold remediation services for residential and commercial properties throughout Bexar County.

The announcement reflects the company's response to growing demand for specialized restoration services following recent severe weather events and property emergencies across the region. Crown Plumbing & Water Damage Restoration will leverage its existing certifications and expertise to provide expanded restoration capabilities while discontinuing routine plumbing services to focus exclusively on disaster recovery and property restoration.

"The frequency and severity of property damage events in San Antonio has increased significantly over the past year, creating an urgent need for specialized restoration services," said Jeremy Newman, Operations

Director at Crown Plumbing & Water Damage Restoration. "This strategic realignment allows us to dedicate our resources and expertise to helping property owners recover from fire damage, water damage, and mold contamination with comprehensive restoration solutions."

The company maintains multiple state licenses including Mold Contractor License RCO1696 and Asbestos Abatement Contractor License 801240, positioning it to handle complex restoration projects that often uncover environmental hazards during the recovery process. Crown's team provides integrated services that address fire damage restoration, water extraction and drying, structural repairs, and professional mold remediation under one coordinated effort.

Fire damage events require immediate response to prevent secondary damage from smoke, soot, and water used in firefighting efforts. Crown's enhanced fire damage restoration services include emergency board-up, smoke and soot removal, structural cleaning, and complete reconstruction services. The company's technicians assess both visible and hidden damage to develop comprehensive restoration plans that return properties to pre-loss condition.

Water damage restoration remains a critical service area, with the company responding to emergencies caused by storm flooding, pipe failures, and sewage backups. Crown's water damage protocols include immediate water extraction, industrial drying equipment deployment, moisture monitoring, and antimicrobial treatments to prevent mold growth. The company maintains 24/7 emergency response capabilities with one-hour dispatch for disaster situations.

Mold remediation services address both emergency mold outbreaks and long-term contamination issues. Crown's certified technicians perform comprehensive mold testing, containment, removal, and prevention measures using industry-standard protocols. The company's mold removal services include HEPA filtration, controlled demolition of contaminated materials, and application of antimicrobial treatments to prevent recurrence.

Crown Plumbing & Water Damage Restoration works directly with major insurance carriers including USAA, Allstate, Farmers, Nationwide, State Farm, and Liberty Mutual, facilitating the claims process for covered restoration work. The company also offers financing options for restoration projects not covered by insurance policies.

About Crown Plumbing & Water Damage Restoration
