

Crown Plumbing & Water Damage Restoration Announces Annual Disaster Relief Program for San Antonio Families

July 31, 2026

SAN ANTONIO, TX - July 31, 2026 -

Crown Plumbing & Water Damage Restoration today announced the launch of its annual disaster relief support program, providing comprehensive restoration and plumbing assistance to families significantly impacted by fires or major disasters throughout the San Antonio area. The initiative reflects the company's commitment to supporting the local community during times of crisis.

The program will provide selected families with complete restoration services, including water damage restoration, fire damage restoration, and essential plumbing repairs at no cost. With the company's recent expansion to new locations on George Road in San Antonio and in Selma, Texas, the disaster relief program will now serve a broader geographic area, ensuring more families have access to critical emergency restoration services.

"When disaster strikes, families face overwhelming challenges that extend far beyond the immediate damage," said Jeremy Newman, Director of Community Outreach at Crown Plumbing & Water Damage Restoration. "Through this annual program, we can address both the plumbing issues that often cause water

damage and handle the complete restoration process, providing families with a single trusted partner during their recovery."

The comprehensive nature of the company's services makes it uniquely positioned to handle disaster recovery efficiently. By combining plumbing expertise with restoration capabilities, the company can address initial problems such as burst pipes or sewage backups while simultaneously managing the resulting structural damage, mold remediation, and complete property restoration.

The disaster relief program comes at a time when many San Antonio families continue to face challenges from severe weather events, aging infrastructure, and unexpected home emergencies. The company's 24/7 emergency response capabilities ensure that selected families receive immediate assistance when disasters occur, minimizing further damage and accelerating the recovery process.

The expansion of service locations has enhanced the company's ability to respond quickly to emergencies across the greater San Antonio metropolitan area. The new facilities on George Road and in Selma complement the company's existing operations, allowing for faster response times and increased capacity to serve families in need.

"Our integrated approach to plumbing and restoration services means families don't have to coordinate between multiple contractors during an already stressful time," added Newman. "From the initial emergency response through complete restoration and reconstruction, we handle every aspect of returning homes to their pre-disaster condition."

The annual program will select recipient families based on need and impact, with priority given to those facing significant hardship due to disasters. The company will work closely with local community organizations to identify families who would benefit most from comprehensive restoration assistance.

Crown Plumbing & Water Damage Restoration specializes in comprehensive plumbing and restoration services throughout San Antonio and surrounding areas. The company provides 24/7 emergency response for water damage restoration, fire damage restoration, mold remediation, sewage cleanup, and complete plumbing services including installation, repair, and maintenance. With expertise in both restoration and plumbing disciplines, the company offers integrated solutions for residential and commercial properties facing water-related emergencies and disasters.
