

Perfect Catch Swimming Pool Repair, Gas, & Electric Expands Comprehensive Repair Services Across Pinellas County

August 04, 2026

LARGO, FL - August 04, 2026 -

Perfect Catch Swimming Pool Repair, Gas, & Electric has announced the expansion of its integrated pool repair and maintenance services throughout Pinellas County, Florida, addressing the growing demand for comprehensive pool care solutions that combine electrical, gas, and mechanical expertise under a single service provider.

The Largo-based company distinguishes itself as the only contractor in Pinellas County that handles swimming pool repair, gas work, and electrical services with four in-house trade licenses, eliminating the need for multiple contractors and streamlining the repair process for pool owners. This integrated approach allows the company to address complex pool system issues that often require expertise across multiple trades.

"Pool owners frequently face challenges when their pool systems require both mechanical repairs and

electrical or gas work," said Yanni Ramos, Operations Manager at Perfect Catch Swimming Pool Repair, Gas, & Electric. "By maintaining all necessary licenses in-house and employing certified technicians across all trades, we can complete comprehensive repairs in a single visit, reducing downtime and ensuring all components work together seamlessly."

The company's expanded services include pool pump repair, which often requires electrical expertise to diagnose motor issues and ensure proper voltage supply. Their technicians handle everything from simple impeller replacements to complete pump motor rebuilds, addressing both the mechanical and electrical aspects of pump failures. The integration of electrical expertise proves particularly valuable when pump issues stem from faulty wiring, inadequate grounding, or circuit breaker problems.

The expansion comes as Pinellas County experiences increased demand for pool services, driven by both new pool construction and the aging of existing pool infrastructure throughout the region. Many pools in the area are reaching the 15 to 20-year mark, when major equipment replacements and system upgrades become necessary.

Perfect Catch maintains a fleet of fully equipped service vehicles staffed by technicians who hold certifications in pool maintenance, electrical work, gas fitting, and general contracting. This allows the company to respond to emergency repair calls with all necessary tools and expertise, often completing repairs on the same day. The company's technicians undergo continuous training on the latest pool equipment technologies, including variable-speed pumps, salt chlorination systems, and automated control systems.

Gas pool heater installation represents another area where Perfect Catch's multi-trade capabilities provide significant advantages. The company's technicians manage the entire installation process, including gas line connections, electrical wiring for control systems, and proper venting requirements. This comprehensive approach ensures that new heater installations meet all safety codes and operate at peak efficiency from day one.

The company serves all of Pinellas County, including Largo, Clearwater, St. Petersburg, Seminole, Palm Harbor, Tarpon Springs, and surrounding communities. Their service area expansion includes both residential and commercial pool facilities, with capabilities ranging from routine maintenance to complete system overhauls.
